FOUNDERS DESK

Mrs. Smita Agrawal

I'm Smita Agrawal, Master in Electronics and Telecommunication Engineering and Diploma in Interior Designing with 10+ years of experience, specialize in transforming spaces that are not only aesthetically pleasing but also highly functional.

My portfolio includes a diverse range of projects in designing residential, bungalows to commercial spaces, restaurant and IT companies. I believe in a design approach that blends creativity with technical precision, ensuring that each space reflects the client's personality, purpose, and comfort.

Mrs. Charu Bhagat

I'm Charu Bhagat, an army officer's wife whose love for interiors led me to pursue a two-year formal education in interior designing. This passion turned into a fulfilling career, and I went on to work as Head Designer at a reputed firm for over a decade. During this time, I designed a wide range of residential and commercial spaces including homes, salons, shops, and restaurants. Today, I run my own design company where I continue to create spaces that beautifully blend aesthetics with functionality. For me, interior design is not just a profession, it's a way of life.

“

"The essence of interior design will always be about people and how they live. It is about the realities of what makes for an attractive, civilized, meaningful environment, not about fashion or what's in or what's out. This is not an easy job."
